SKILLS

- **Languages:** Python, SQL, C/C++, HTML and CSS
- **Frameworks & Libraries:** Git, NumPy, Pandas, Matplotlib, Seaborn, Scikit-Learn, Streamlit, Tkinter
- **Tools & Platforms:** MySQL, Ubuntu, JupyterLab, VS Code, IDLE
- **Core CS Fundamentals:** DBMS, Operating System, Computer Networks, OOP, Data Structures and Algorithm
- **Soft Skills:** Time Management, Analytical Thinking, Problem-Solving, Teamwork

PROJECTS

- Telco Churn Prediction app** | [GitHub](#) July' 25
- Developed a machine learning web application using a real-world dataset to predict telecom customer churn using Logistic Regression, Random Forest, and Decision Tree models.
 - Performed data preprocessing including feature engineering, missing value handling, and data normalization.
 - Achieved 80% accuracy using Random Forest model.
 - Deployed model insights through an interactive interface for business decision support.
- Tech stack:** Python, Pandas, Scikit-Learn, Matplotlib
- Real-Time Monitoring Dashboard** | [GitHub](#) Mar' 25
- Developed a lightweight desktop dashboard to monitor system performance and running processes in real time.
 - Performed live CPU usage visualization with automatic refresh every 5 seconds using Matplotlib.
 - Added process management features including search, filtering, and multi-process termination with confirmation dialogs.
 - Improved system monitoring efficiency through an interactive GUI interface.
- Tech stack:** Python, Tkinter, Psutil, Matplotlib, GPUtil
- AI Music Assistant** | [GitHub](#) Feb' 25
- Developed an AI-powered music recommendation assistant with an interactive Streamlit interface.
 - Integrated Spotify API using Spotipy for secure authentication and real-time music data retrieval.
 - Added intelligent search and recommendation features for tracks, artists, and playlists.
 - Designed a user-friendly UI displaying album artwork, track details, audio previews, and personalized suggestions.
- Tech stack:** Python, Streamlit, Spotify API, Spotipy

TRAINING

- Machine Learning Made Easy: From Basics to AI Applications** July' 25
- Completed a hands-on training program focused on Machine Learning concepts, data preprocessing, and predictive modeling using Python.
 - Developed a real-world project Telco Churn Prediction App to predict telecom customer churn using classification algorithms.
- Tech stack:** Python, Pandas, NumPy, Scikit-Learn, Matplotlib

CERTIFICATES

- ChatGPT-4 Prompt Engineering: ChatGPT, Generative AI & LLM | [Link](#) Aug' 25
- Machine Learning Made Easy: From Basics to AI Applications | [Link](#) Jul' 25
- Cloud Computing - NPTEL IIT Kharagpur | [Link](#) Apr' 25
- Introduction to Hardware and Operating Systems | [Link](#) Sep' 24

ACHIEVEMENTS

- Participated in AWS Community Day and received a participation reward from the event organizers. Nov' 25
- Completed the AWS Workshop on AI & ML Nov' 25
- Secured an O Grade in the Summer Training July' 25
- Participated in the Hackathon: InnovateX Oct' 23

EDUCATION

Lovely Professional University	Punjab, India
Bachelor of Technology - Computer Science and Engineering; CGPA: 7.02	2023 - Present
SP Smart School	Sarore, Jammu
Intermediate; Percentage: 70%	2022 - 2023
Fatima Convent High School	Bishnah, Jammu
Matriculation; CGPA: 9.20	2020 - 2021
